Plan Review Requirements for Fire Applications

Plans are required for:	<ul style="list-style-type: none"> **Commercial: Fire Sprinklers (Existing systems >15 heads OR New system) **Single Family: Fire Sprinklers **Any fire sprinklers in conjunction with a spray paint booth **New Fire Alarm Systems or installations of fire alarm devices to an existing system **Fire Alarm Panels **All Preaction Systems **Special Extinguishing System (FM-200, Wet/Dry Chemical, foam) **Fire Suppression System for a Kitchen Hood **Sprinkler Underground Main **Building Radio Coverage
How many copies of plans?	2 copies required for Fire Protection Applications
What needs to be on the plans?	All submittals must include all items listed in the Bellevue Fire Dept Development Standards. For Sprinkler installations show all items from NFPA-13, 6-1.1 and related equipment (pumps, tanks, standpipes). Fire alarm plans must show all items required for compliance with NFPA-72 including related issues such as airflow rates, motor controls, doors, and fuel control. Smoke Control only to be shown on dedicated drawings, including performance matrix & criteria, all equipment and components, and all operation sequences.
Who can answer code or plan review questions?	Adrian Jones (425) 452-6032
	Travis Ripley (425) 452-6042
